 647-636-2023

 Mississauga, ON, Canada

## PROJECTS

### N-Queens Problem – C & Python

- Collaboratively worked to solve and present the problem using pre-processing and the min-conflicts algorithm.
- Queens are initially placed on the board using the greedy algorithm making the solving process much quicker.
- Created a GUI using Python (pygame module) to display multiple test results on the chessboard.

### Portfolio Website – HTML, CSS, JavaScript

- Created a personal portfolio website with fully functional reactive animations and elements.
- Built using web development technologies HTML, CSS, and JavaScript hosted using GitHub sites.
- Website includes support for mobile devices and is response to all screen sizes.

---
