Work Experiences

IT Support Specialist | GaoTek Inc. – Toronto, ON (*Remote*) **May 2023 – Present**

- Successfully debugged problems related to handling API requests and responses, resolving issues within the designated timeframe and ensuring seamless data communication.
- Played a pivotal role in the development and execution of comprehensive test cases, ensuring the quality and functionality of mobile applications with a 98% test coverage, reducing post-release defects by 25%.
- Significantly improved the source code of mobile applications by implementing more efficient Kotlin libraries and methods, resulting in a reduction in app response time and enhanced user experience.
- Collaborated with cross-functional teams to gather feedback and insights, leading to the implementation of user-centered design improvements.

Operations Representative | Fidelity Clearing Canada – Toronto, ON (*Remote*) **Jan 2022 – Aug 2022**

- Demonstrated exceptional attention to detail and motivation in creating, preparing, and analyzing statistical MS Excel reports.
- Maintained strong interpersonal and professional skills while diligently following up with firms regarding the status of a transfer.
- Proficiently updated and managed an average of 20 files per day for mutual funds and registered products processing using Dataphile, resulting in a streamlined and error-free system.

Sales Specialist | The Source (Bell) – Mississauga, ON **July 2021 – Jan 2023**

- Helped build easy solutions for customers using strong problem-solving skills and teamwork.
- Demonstrated outstanding communication and interpersonal skills to effectively promote and sell internet and cell phone plans, contributing to a 30% overall increase in the teams monthly sales.
- Consistently exceeded monthly sales targets by 15% through exceptional customer service, building rapport and delivering personalized solutions that addresses their unique needs and preferences.

Projects

Portfolio Website | HTML, CSS, JavaScript [🔗](#)

- Created a personal portfolio website with fully functional reactive animations and elements.
- Built using web development technologies HTML, CSS, and JavaScript hosted using GitHub sites.
- Website includes support for mobile devices and is responsive to all screen sizes.

Student Database | Excel VBA, Microsoft SQL Server

- Implemented VBA code to create user-friendly interfaces and automate repetitive tasks in Excel.
- Automated Excel macros to analyze data trends, calculate aggregates, and generate useful statistics.
- Used SQL statements to retrieve data from the Access Database based on user-defined criteria.
